SKILLS

- **Languages:** : Typescript/Javascript, LESS/CSS, HTML, Java
- **Technologies:** : React, OpenAI, Next.js, Framer Motion, Node.js, Git, Spring Boot, GCP, Kubernetes
- **Design Tooling:** : Figma, Rive, Illustrator, Photoshop, Kapwing

EXPERIENCE

- **Squarespace** New York, NY
Senior Software Engineer II *August 2018 – Present*
 - **Google Domains Acquisition:** Led the integration of 10 million Google domains, ensuring feature parity via collaboration with product managers and designers.
 - **SEO Free Tools:** Partnered with OpenAI to design prompts for servicing SEO-focused single page apps.
 - **Mobile Path to Publish:** Architected and implemented a mobile-specific onboarding flow which increased landing-to-trial by 21% and landing-to-subscription by 27%.
 - **Domain Search:** Modernized a 6-years outdated domain search api library with Redux Toolkit to decrease search latency by 60%.
 - **Frontsite Component Library:** Documented and guided the development of the squarespace.com component library, leveraging atomic design principles and Typescript.
 - **Universal Checkout:** Increased trial-to-paid plan mix of Squarespace website subscriptions by 10% through delivering a modernized checkout experience (+\$2mil annual revenue in the first year).
 - **Asynchronous Domain Transfer:** Integrated asynchrony into the domain transfer flow to unblock customer action trapping and increase overall domain transfer success rates from 76% to 98%.
 - **Typescript:** Established developer guidelines for Typescript adoption and documentation standards.
- **Clear Capital** Roseville, CA
Frontend Engineer *June 2017 – April 2018*
 - **ClearCollateral:** Rebuilt the ClearCollateral platform using React JS alongside Redux and Express from its original PHP implementation.
 - **Documentation:** Directed and documented styling structure for app-wide UI/UX coherence for a small team of 5 engineers.
 - **Jest Testing:** Expanded test coverage by 36% between existing and newly-added components.
- **Calix Inc.** Petaluma, CA
Software Engineering Intern *Summer 2016*
 - **Meteor.js:** Implemented Meteor.js clustering for load balancing alongside nginx to increase Compass resilience and scalability.
 - **Docker Migration:** Initiated a migration of critical web services to Docker to simplify deployment and upgrade processes on a cloud-based infrastructure.
 - **Elasticsearch optimization:** Boosted Elasticsearch performance by a factor of 5 through fine-tuning ngram analysis.

EDUCATION

- **University of California, Davis** Davis, CA
B.S. in Computer Science, Minor in Design, GPA: 3.66 *September 2014 – March 2018*

AWARDS AND HONORS

- **Hack Davis 2018 Winner:** Winner of Hack Davis 2018 Education category with a cloud-driven lecture platform.
- **Design-by-Design:** Featured in UC Davis' Design-by-Design Exhibition for experimental digital design.
